

Amendments To the Claims:

Please amend the claims as shown. Applicants reserve the right to pursue any cancelled claims at a later date.

1.-7. (cancelled)

8. (new) A production machine comprising a control integrated in a Web server, wherein the Web server comprises software modules, and wherein at least a first software module comprises first mechanisms to implement the control.

9. (new) The production machine according to Claim 8, wherein the Web server comprises a connection with a communications network.

10. (new) The production machine according to Claim 9, wherein the communications network is the Internet.

11. (new) The production machine according to Claim 8, wherein Internet protocols are provided for communication between the software modules and for communication between the software modules and components outside the Web server.

12. (new) The production machine according to Claim 9, wherein Internet protocols are provided for communication between the software modules and for communication between the software modules and components outside the Web server.

13. (new) The production machine according to Claim 8, wherein the Web server is adapted for configuring and administrating the software modules.

14. (new) The production machine according to Claim 9, wherein the Web server is adapted for configuring and administrating the software modules.

15. (new) The production machine according to Claim 11, wherein the Web server is adapted for configuring and administrating the software modules.

16. (new) The production machine according to Claim 8, wherein the Web server comprises a connection to the Internet via a firewall.

17. (new) The production machine according to Claim 9, wherein the Web server comprises a connection to the Internet via a firewall.

18. (new) The production machine according to Claim 11, wherein the Web server comprises a connection to the Internet via a firewall.

19. (new) The production machine according to Claim 13, wherein the Web server comprises a connection to the Internet via a firewall.

20. (new) The production machine according to Claim 8, wherein the Web server is connected via a communications network with a Web browser as operating and monitoring system.

21. (new) The production machine according to Claim 9, wherein the Web server is connected via a communications network with a Web browser as operating and monitoring system.

22. (new) The production machine according to Claim 11, wherein the Web server is connected via a communications network with a Web browser as operating and monitoring system.

23. (new) The production machine according to Claim 13, wherein the Web server is connected via a communications network with a Web browser as operating and monitoring system.

24. (new) The production machine according to Claim 16, wherein the Web server is connected via a communications network with a Web browser as operating and monitoring system.

25. (new) The production machine according to Claim 8, wherein the Web server comprises a real-time operating system.

26. (new) The production machine according to Claim 9, wherein the Web server comprises a real-time operating system.

27. (new) The production machine according to Claim 11, wherein the Web server comprises a real-time operating system.
